

# How to Cheaply Use Azure: Saving Money

by Bryan Cafferky  
Copyright 2023

# Air Conditioner & Electricity

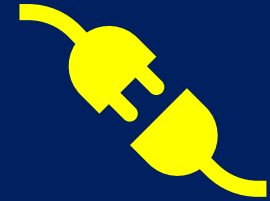

No guarantees, just my opinions.

**300 BTUs**  
**100 Sq Feet**

**3000 BTUs**  
**10000 Sq Feet**

**Pay for  
Electricity**

# Air Conditioner & Electricity

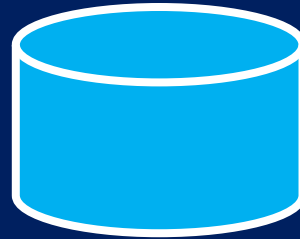

No guarantees, just my opinions.

Usually Most of Your Cost

**Compute**

*Usage of CPUs  
&  
Memory*

**Storage**

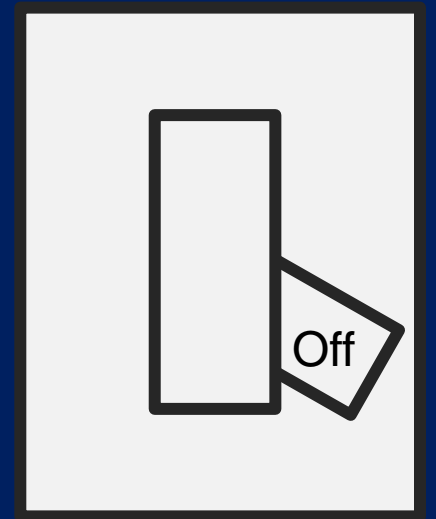

*Anything  
physically  
stored.*

# Critical Things to Consider

## Laying the Conceptual Foundation

- **Size the Azure resource to the minimal need**
- **Turn It OFF or Delete It when Not In Use!!!**
- **Use Automation to Do the Above**
- **Check Your Azure Subscription Charges Often**
- **Cautiously Experiment**

# Wrapping Up

- Azure consumption cost is like electricity
- Turn things off
- Create minimal size resources
- The Azure Pricing Calculator

Thank You!
